

Introducing our NEW CANOPY CARPORT!

Protect your vehicles with a
modern freestanding CARPORT!
Available for a single or double parking spot.

Our cantilever carports are assembled with zinc coated steel brackets, aluminum alloy frames and tensioned membrane structures with PVDF coated surfaces.

This strong and durable structure is designed to support hurricane winds, to protect from snow and rain, and to prevent heat damage from the sun. It can be mounted on concrete, pavers or asphalt.

Our freestanding Canopy Carport is a practical and affordable option to keep your beloved cars in a safe and dry space!

Contact EconoWise for pricing and reserve yours today!
